Project Demo Planning

Date	30 june 2026
Team ID	SWTID-2026-6540
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, objectives, and problem statement.	2 min	Umamaheswari Ummidisetti
2	System Architecture & Tech Stack	Explain the architecture, workflow, and technologies used.	3 min	Umamaheswari Ummidisetti
3	Application Demonstration	Show the user interface, enter sample inputs, and perform crop prediction.	5 min	Bhaskar Kovela
4	Machine Learning Model	Explain dataset, model training, model selection, and prediction process.	3 min	Bhaskar Kovela
5	Testing & Results	Present testing scenarios, outputs, observations, and performance.	2 min	Bhaskar Kovela
6	Conclusion & Future Enhancements	Summarize the project, discuss benefits, and present future scope.	2 min	Bhaskar Kovela

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the project, explain the challenges in crop selection, and describe the need for an AI-based crop recommendation system.
2	Solution Overview	Present the project architecture, workflow, technology stack, machine learning model, and key features of OptiCrop.
3	Live Feature Demonstration	Run the application, enter sample soil and environmental values, perform crop prediction, and display the recommended crop.
4	Q&A Session	Answer questions related to the dataset, machine learning model, implementation, testing, and future enhancements.
