

Brainstorming & Idea Prioritization Template

Date	27 JUNE 2026
Team ID	SWTID-2026-6540
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Bhaskar Kovala	Develop an AI-powered smart agriculture system that analyzes soil and environmental conditions to recommend the most suitable crop. The system aims to improve crop productivity while optimizing the use of water, fertilizers, and other resources.		
2	Umamaheswari Ummidisetti	Build a smart crop recommendation system using AI and machine learning. It will guide farmers in selecting the best crop for their land based on soil and climate conditions.		

3				
4				
5				
6				

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Create a machine learning-based platform that helps farmers make informed crop selection decisions using agricultural and environmental data. This solution supports sustainable farming and increases agricultural efficiency.	high	high	Improve crop selection accuracy and maximize farm productivity using AI-driven recommendations.	yes
